DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 36-46 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 28-30, 32 and 34 of U.S. Patent No. 6,993,393. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are directed to obvious variations of near field transmission, far field communication, and powering based on a duty cycle.

Allowable Subject Matter

Claims 1-24 and 28 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The time of the duty cycle being determined based on an inbound signal or a

Art Unit: 3762

signal received by the near field antenna in an implantable medical device as claimed is not anticipated nor suggested by the prior art of record.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Thompson et al (US 6,652,00) teach an RF signal may be transmitted by a device such as an interrogator or a clinician's programmer configured to transmit the RF signal where the signal can be at any acceptable frequency from the very near field to the far field. There lacks any teaching or suggestion to combine the features of a duty cycle with RF signal or to change from a near field signal to a far field signal.
